## **Notice of Data Recovery Plan Activation**

Skynet Worldwide (M) Sdn Bhd has detected a security breach on 27 September 2021 and launched our data recovery plan. We are still assessing the extent of the security breach, but our investigation shows that there is no indication of leakage of confidential data except for some internal data.

We take this cyber security breach very seriously and have done the necessary measures and solutions to tighten our IT infrastructure and security. Unfortunately, we still fell victim to this cybercrime.

Since then, we have engaged the help of a cyber security specialist and are taking immediate actions to further reinforce our security measures.

Our operations are functioning as normal, and we have had to take down our website for a moment to facilitate the tightening measures. This incident has been reported to the Malaysian Communications and Multimedia Commission and a police report has been lodged. We apologise for any inconvenience caused.

From the Management of Skynet Worldwide (M) Sdn Bhd
